DETAILED ACTION

1. This application has been examined. The preliminary amendment filed 9/21/01 has been entered. Claims 1-20 are pending.
2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.
3. The drawings are objected to because the block shown in Fig. 1 must be labeled with a descriptive legend.. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
4. The IDS filed 10/17/01 has been considered.
5. Claims 13-20 are objected to because of the following informalities: In claim 13, line 1, "interior" should be --interlock--. Appropriate correction is required.
6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. As per claim 1, there does not appear to be a nexus between what is set forth in the preamble and the subject matter of the body of the claim. The body of the claim appears to be directed to controlling operation of the gear shift lever whereas the preamble describes preventing operation of an auxiliary device. Further, the claimed subject matter is inconsistent with subject matter disclosed in the specification. The claim recites that "the gear shift lever may be shifted out of park only if the parking brake is *engaged*" whereas the specification at page 3 states that the invention operates

Art Unit: 3661

“to *prevent* the vehicle from being shifted out of “park” anytime the parking brake is applied”.

B. As per claims 2 and 3, the claimed subject matter is inconsistent with the subject matter recited in base claim 1. Claim 1 states that the gear shift lever may be shifted out of park only if the parking brake is engaged whereas claims 2 and 3 state that the gear shift lever is *prevented* from being shifted out of park if the parking brake is engaged.

C. As per claim 13, the preamble states that a lift device is “prevented from operating unless said vehicle is in a secure position”; however, the body of the claim does not recite any structures which determine whether the vehicle is in a secure position. At most the body of the claim recites structures which prevent lift operation if at least one sensed condition is present.

D. All claims depending from a rejected base claim are also rejected as containing the same deficiencies.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited patents represent the general state of the art of vehicle lift systems.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Zanelli whose telephone number is (703) 305-9756.

The examiner can normally be reached on Monday-Thursday 5:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William A. Cuchlinski can be reached on (703) 308-3873. The fax phone numbers
